

12 Facts

Every stencil business
should know about LPKF

MAXIMUM EFFICIENCY FOR YOUR SMT STENCIL PRODUCTION

LPKF[®]
Laser & Electronics

12

Facts about LPKF...

Fact

1

1

Commitment to Stencil Business and our Clients

We work with hundreds of stencil businesses, giving us an excellent understanding of the challenges the industry faces.

We are committed to helping your business succeed and to provide you with business tools to do so including, Research, Marketing, and worldwide Customer Service.

Fact

2

2

Innovations

LPKF has contributed innovations that shaped the industry:

- Scanner based beam delivery
- Automatic foil clamping fixture
- Automatic nozzle cleaning, just to name a few...

Fact

3

3

The Industry's **Best** Stencil Editing Software

CircuitCAM has many editing features that are specific to the SMT stencil industry, providing a powerful tool that helps stencil companies service their customers much more efficiently.

Fact

4

4

Rock Solid Testing

Each new Stencil Laser platform is thoroughly tested to identify and eliminate possible issues that could impact their productivity. For us uptime is just as important as high performance.

Each individual system that rolls off the production line must pass an iron-clad testing protocol. LPKF stencil laser systems are production-ready when they arrive.

Fact

5

5

Small Form Factor

LPKF was the first company to integrate laser source, control PC and motion controller into one small form factor. At the same time we have reduced the total weight of stencil lasers by 25% without compromising accuracy or durability.

This also allows for simplified relocation of a system.

Fact

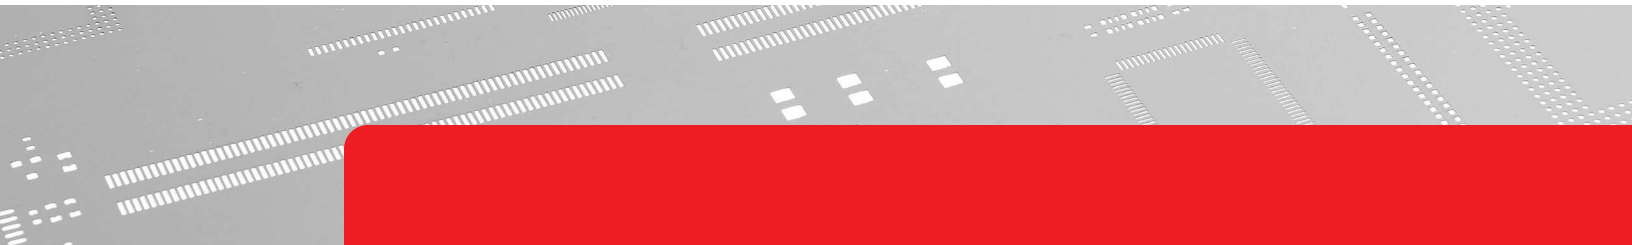

6

6

Worldwide **Service**

No matter where a stencil laser is located (...or moved to) it's always covered by genuine LPKF factory service.

Service hubs on 3 continents demonstrate the level of commitment LPKF puts behind its products.

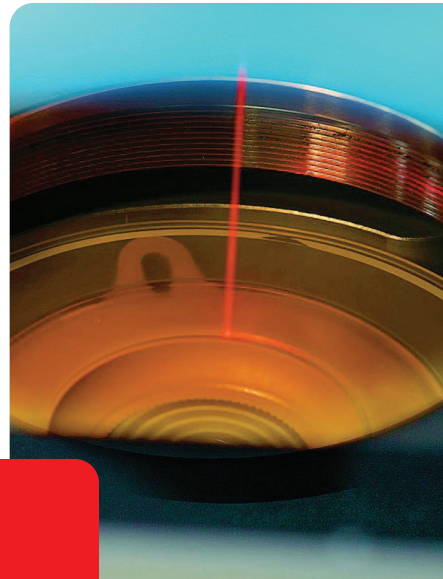

Fact

7

7

Class I Laser Safety

We keep the safety of the operator in mind. All LPKF StencilLaser systems are compliant with Class I laser safety and feature an open, easy-access architecture to allow the most convenient operation, simplified material handling, and with that, maximum throughput.

Fact

8

8

Safe Investment

Investment in capital equipment is a big deal and it often represents the biggest individual asset for a business. LPKF StencilLaser systems are designed from the ground up to be a safe and sound asset for you. They can be easily upgraded with newer technologies by replacing modules such as modern laser sources, faster beam delivery systems, and many others. Our systems have the longest in-service life of any stencil cutting equipment in the industry.

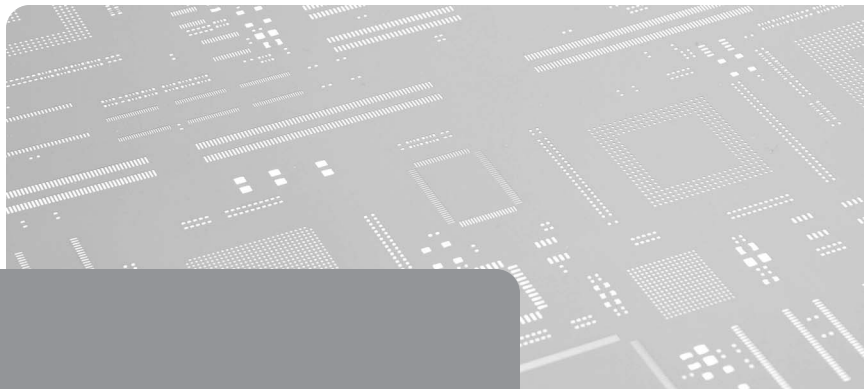

Fact

9

9

Complete Solution Provider

LPKF is a total system solution provider and our customers never have to work with different vendors. We provide and service the entire system solution including CAM software, laser source, motion system, optics and control PC.

Fact

10₁₀

All Businesses Receive
the **Same Level of Service.**
Regardless of Size.

The same level of service and commitment is offered to large corporate customers with systems all around the world that is also offered to small businesses that are just getting started in the stencil industry with their first system.

Fact

11

11

Customer Satisfaction

Go ahead ask around. You will notice that LPKF customers rank LPKF's customer service and product quality higher than any other stencil laser equipment manufacturer.

Fact

12₁₂

Financing Tools

LPKF works directly with name-brand financial services to offer a full suite of financing tools including short-term financing and leasing.
